A. EXERCISES WITH SECTIONS

I.

Ida meas, mater, moriturae percipe voces.
Labra meis labris roseumque os appulit ori,
Atque ait, 'Hoc mensae jactum super incidit, omnes
Cum divi coetu complerent atria Pelei ;
Inde satae lites, quatenam sibi moenus haberet
Jure suo. Quod heri mihi vespere detulit Iris
Atque adlapsa levis servandum tradidit ultro,
Qui sim mente deum communique editus ore
Arbiter. Hanc autem Juno et cum Cypride Pallas
Praestantis palmam formae sibi quaque petentes
Mox aderunt. At tu poteris secreta sub antro
Qua latebram illa facit strepitumque veterrima pinus,
Non audita audire tuum, non visa videre
Disceptantem iras Paridem litesque deorum. *T. S. E.*

Ida meas, mater, moriturae percipe voces.
Ibat sol medius caeli ; temere avia nubes
Concolor argento latera inter pinea vallis

Errabat : [nemoris tum devenere viretum :
 Nudae muscosum nemoris venere sub umbram.]
 Emicuere solo croceusque simillimus igni
 Flos et amaracinus cum purpureo narcisso
 Liliaque et violae et lotos gradientibus ; auraeque
 Adflavere ; supraque hederæ errabundaque vitis,
 Multiplici maeandro in velamenta fluentes,
 Exsultim ac penitus per brachia torta serebant
 Bacasque floresque racemiferosque corymbos.

Huc ades, o Pastor, laurus viridissima manes
 Daphnidis arcessat ; doctas amat ille Camenas.
 Florea mox verno se vestiat Hybla colore,
 Flores sparge manu nec non pia carmina canta,
 Quæ pueros doceant ut adhuc venientibus annis
 Daphnim concelebrent et vincant saecula canendo.
 Ipse ego suppliciter lacrimas pro munere fundam.
 Pauperis haud impar dolor est si caespite maeret,
 Vile quidem struit at viridans : sic nobile carmen
 Hic super ossa legant Musarum et Apollinis hostes
 Ignavi, et titulus falsis non falsa loquatur.
 Conditur hic Daphnis : rapidus Sol imputat horas
 Atque iter irrequietus agit ; sed, Daphni, quiescis,
 Fama furor tantum : somnus sapientia, qualem
 Hic amat, his spernit, naturaque ludit utrumque :
 Mens tamen instat ovans et pro se litigat usque,
 Omnia dum pateant et stent rata morte suprema.

Tertia vix illis caelo processerat hora
Cum sol signa ferens hiemis, ceu flamma cometae,
Condidit Oceano taedas : fluitantia vela
Extendunt dubii flatus laxantque vicissim.
Tum procul auditur raucum super aequora murmur ;
Noxque ruit, tacito non fallens lumina lapsu,
Sed casu subito ; consurgunt undique venti :
Fulminis inde fragor sequitur ; flammantia tela
Diffugiunt ; frustra dedit irrita jussa magister,
Nautarumque chorus trepidantia brachia frustra
Aptarunt operi ; vis improvisa procellae
Illudit curis : jam tum spes tota laborem
Destituit ; fluctus inter ventosque carina
Nunc huc nunc illuc gyros jactata revolvit,
Attonita adversis plagis : modo pergere cursu
Incipit, opposito modo monte repulsa quiescit.

H. E. Currey.

VIII.

Dixerat ; atque aversa levi pede praeterit Iris.
Tum magni tutela Jovis surrexit Achilles :
Invictisque umeris circumdedit aegida Pallas
Ipsa suam serpentigeram : dein nubis et auri
Splendentem imposuit capiti dea clara coronam,
Unde accensa replet late loca lumine flamma.
Ac velut e terra petit altas aetheris oras
Fumus, ubi infestis procul insula cingitur armis :
Bella nefanda cient ad finem lucis ab ortu,
Urbe sua egressi : sed sol ubi mergitur undis,
Crebri ardent ignes, alteque effusa relucet
Flamma procul, socii si forte per aequora vecti
Auxiliumque et opes jungent, data signa secuti :
Illius haud aliter capitis ferit aethera fulgor.
E muro ad fossam egressus stetit, agmen Achivom
Necdum iniit, doctae non immemor ille parentis ;

Stansque ibi Pelides clamat, longeque reclamat
Pallas : at infando Teucri tremuere pavore.

J. Adam.

IX.

Mater, quam morior prius hanc quoque percipe vocem.
Ventum est in piceas : piceae, mea silva, recisae,
Procerum nemus : umbra horrens ea vertice rupis
Alta super fauces ferrugineumque barathrum
Impendebat ; apex niveus qua stabat, ab illo
Usque ad decursum nive candidioris aquai
Hospitium nidis aquilarum implumibus ; unde
Mane tenebroso per opaca silentia silvae
Visa mihi fremere obscurum panthera, sedenti
Valle cava. Non jam stantes tractim ire per illas
Aera matutinum Oenone sola videbit
Amplius, aut lunae sub lumine tenuia ferri
Vellera per silvam nebularum candida nigram,
Interfusa sonantem undam nictantiaque astra.

T. S. E.

X.

At valeas : via enim, credo, longinqua paratur
His mihi quos spectas sociis—an fallor, et anceps
Vana monet dubiis mens excaecata tenebris—
Imus, et aequorei vallem Avilionis amoenam
Adferimur : non imber ibi, non grandinis horror,
Non nivium ventive furor : patet insula lato
Illa agro, pomis et multa fertilis herba,
Suspicit et vitreum apricis de vallibus aequor.
Illic inveniet durum medicamina volnus.

Dixerat : avehitur linter litusque reliquit
Remigio ventisque citus : sic pectus in aequor
Demittit moriturus olor plumasque superbas
Excutiens niveas, pleno de pectore carmen
Praescius effundit, nigro et pede remigat undam.
Adstitit ille diu memori permulta revolvens

Corde, procul donec venturi aevta ruborem
Vix macula exigua distinxit cymba diei,
Et maestae tandem siluere per aequora voces.

H. N. Bate.

XI.

- (a) Hactenus orantis Clymenes effusa loquela.
Haud secus ac metuens trepidis cum rivulus undis
Jam lapidosa fluens sensim per littora cessat
Et dubitat coiisse mari : tandem ille marinis
Obvius it furiis et inhorruit : Enceladi vox
Improba vocem immensi immissis devorat iris.
Vis verborum onerosa, velut nigra personat unda
Antraque semirepleta aestu rupesque latentes,
Ingeminans talis reboat, dum nititur ulnis
Ille, nec indignans (cui tanta superbia) surgit :
 ‘Utrum Titanis nimis est qui, Numina, prudens,
An monitis nimium stultae parere placebit?
Nam neque fulminibus superaddita fulmina, donec
Cuncta rebellis erunt Jovis arma exhausta, nec orbes
Orbibus impositi terrarum, queis ego tergum
Subiciam exstructis,—tantum haec praecordia laedant,
Quantum ignominia in turpi puerilia verba.
- (b) Dicite, raucisoni strepите, O Titania proles !
Clamate, exululate, inhoneste exsurgite somno !
Num vos immemores quot verbera saeva, quot ictus
Experti tum sitis ? An exsuperaverit iste
Vos tiro ? Calidae sane oblivisceris, o tu
False potens ponti, diraeque voraginis ?—Irasne
Impulerint tam pauca atque arte carentia verba ?
Omnino rebus pessum haud ivisse refractis
Vos bene sit ! Juvat atque oculos sic torva tueri,
Dum mille ulcisci cupiunt !’ Dum talia fatur,
Corporis immanis sublata mole, deus stat,
Vixque moris intermissis sic dicere pergit :

‘Ignibus accensos furiarum ardere docebo,
 Aethera et hostili purgare hac peste : recurvique
 Exacuisse ignis mala vulnera, qualibus usi
 Nubila victoris tumida amburatis, et istum—
 Auram quam tenuem !—fumis angatis inermem.

- (c) O patiens graviora luat peccata ! Quod artes
 Objicit Oceanus vanas, me taeduit : esto :
 Sed dempto super imperio quam paullula cura !
 Nam fuit alta quies, fuit acta per otia vita
 Torpens : heu nobis fuit irrevocabile tempus,
 Noxia dum non bella, alto dum Numina caelo
 Candida quotquot erunt vigilaci more subibant,
 Quaenam essent nostri scitatum oracula coetus.
 Nondum tristis erat fronti addita ruga : labellis
 (Nil aliud) solemne sonabat : vixque licebat
 Scire quidem nos te, Victoria, vincere posse,
 Nosque a te volucris pulsos, Victoria, vinci.
 Quin—meminisse decet—virtus Hyperionis exstat
 Integra, qui fratrum nitidissimus : ecce relucens
 Ipse Hyperionius clarescit in aethere fulgor !

Dixerat : Enceladi in vultum sua lumina cuncti
 Nec mora convertunt : dum vox Hyperionis illa
 Per rupes perque antra volat prolapsa labellis,
 En radius pallens lucescit in ore severo,
 Haud saevo tamen, indignans nam mille gigantes
 Aeque indignantes cernit. Circumspicit omnes :
 Atque os quodque sua vindictae luce refulsit.

- (d) Praecipue ante alios facies Saturnia fulget,
 Canities magnae splendet cui plurima fronti,
 Ut quondam alta sinum adlabens quum prora propinquat
 Nocte intempesta : nave incedente per undas
 Spuma salit trepidatque : recanduit uncta carina.
 Pallentes cuncti sic clara silentia servant.

Tum subito, velut Aurorae, transire per omnes
 Ecce, minas saxorum atras jubar, omnia porro
 Per loca senta situ tristissima, perque barathra
 Ima, ubicunque nigrans tellus antiqua dehiscit ;
 Nullaque terrarum non ardua, nullus hiatus
 Non lucescit, ubi silet omne, vel omnia circum
 Stridenti vexant sonitu saxosa fluenta :
 Et cataractarum quod fervet cunque per aevum
 Omne, cadunt quae praecipites ubicunque locorum
 Torrentes, prius obductis quae cuncta tenebat
 Caligo tenebris immanibus—illa retexit
 Lux, quae formidanda magis venit inde videnti.

S. E. W

xii. *Mycerinus*.

- (a) At vero, o cives, quondam mea cura, putabam
 Justitiam praebere deos mortalibus aegris :
 Namque deis vita est justissima. Nonne superno
 Fonte emissa nitet quasi lux, melioris et instar
 Exemplaris adest, sedes cui concava caeli ?
 Nonne viris, quae lux regionibus aucta beatis,
 Vita adumbrat uti felix sit caelicolarum ?
 Talia mens humana ultro—quam vana !—revolvit,
 Quam sibi crudelis ! Quaeque allexere volentem
 Deliciis non ausa frui ! Dulcedine raptā,
 Illicet effugere haec somnia falsa, potentis (subacti)
 Dona sui (sibi) quum mens tandem decepta poposcit ;
 Absque deis aequus, qui sese exercuit, aevi
 Praemia commoti, finem sortitur iniquum.
 Numina dira deūm, tamen hoc tam tenue videtur,
 Quae plerumque viros delectant, dulcia vitae
 Contempsisse ? Nihil juvat indulgere choreis
 Floribus incinctos, et amantes carpere gratam
 Inde vel inde viam, dapibusque ardere repostis ?
 Ergo hoc immoti vos cernitis ? Anne potestis
 Non di, sed simulacra, hebeti frigere veterno ?

- (b) Estne ut Vis quaedam cui sit sapientia major,
(Quae valeat nimium), quam qualem aut vincere pugna
Aut ipsi insidiis possitis fallere, caelum
Telluremque simul, nec non contorqueat ipsos
Saeva deos hominesque, fluens ceu magnus et undans
Bello cuncta ruit Nilus? Fors numina et ipsa,
Queis inopes validis usque inservire necesse,
Servi perpetiuntur inexorabile Fatum.
Forsan inaurati medio volvuntur Olympo
Quadrijugi currus, quo vox humana valebat
Scandere numquam enisa : aut sese immittere gaudent
Stellarumque per ambages tractusque, furentes
Dum turbata sono nocturna silentia carpunt.
An surdi, in soliis splendore nitentibus, aevum
Ducitis immunes, Fortunae et amystide fructi?
Quare igitur, si res sic est, amittere luxum,
Quam brevis, aut si quae gratissima somnia, fas est,
Qua eve placet juveni mala quantulacunque libido?
Quidnam de dominis frustra verba irrita verbis
Contexamus adhuc, quos non vidisse licebit,
Caeca voluntatis praesagia deducentes
Necquicquam omnipotentis? Et in ferrugine densa
Numina, si qua latent, nusquam mortalia tangunt.
- (c) Quid? Reliqua in vitae regnabunt dulcia parte!
Dum loquor hora fugit! Ceu lux a sidere missa—
Ecce utrinque premit nubes glomerata—renidet
Vesca modo atque minuta, modo coeuntibus una
Objicibus, periit: se jungunt acta futuraque
Haud secus innexa, haud secus obducuntur, acerbum
Quod remanet spatium, seni, non amplius, anni.
Sex anni—spatia at quam parvula!—temporis instar
Guttarum! Quotiens ast pulcher surget Apollo,
Contrahet atque arcum sibi Luna, senesque peribunt,
Et juvenes facient vitae stipendia, nec non

Languida marcebitque efflorescetque voluptas !
At quotiens prius aspicient, quam cesserit hora,
Di, tranquilla cohors, delectamenta beatis
Vix imitanda deis, miro et convivium luxu !
Protenus in nemora exibo lucosque silentes :
Ast aliquid verbi dicendum est ore, querellae
Nescio quid dubium. Namque irrevocabile fatum
Quod placuit divis serum haud defertur in annum.
Quidnam profuerint lacrimae, quid dona precesque ?
Nox cito fusca subit : noctis cadit umbra per agros.

Ascensu supero et nudas : mox desuper atra
Purpurea occulcans gradior vaccinia planta.
Saepius et serpens ventis glomerata (delapsa) peragrans
Clam folia attonitus sonitum dedit. Omne relinquens
Protenus acer eo, ignara nec mente revolve
Quo ferar. Est nova dulcedo quae, luce diei
Haud minus alma oriens, subita et ceu flabra procellae
Aestivae, et laetans qualis sub tempora veris
Primula progenies nata est, nunc allicit omnem
Me facilem, aut sequitur, ducis aut vice functus amici.
Nam domita, quae olim dominata, libidine, sensi
Tandem liber ego. Fulvo jam cortice surgit
Hic abies, illic se tollit rara, rubeta
Qua saeva horrescunt dumis, tenuissima quercus.
Sic mihi triste nemus convexus sublevat altum,
More maris dum longinqui cava murmura mittit.
- (b) Has ultrix teneat Cura et Sapientia sedes :
Has viduatus amore, fovens sub pectore vulnus,
Improba quem cepere (tetigere) instantis taedia vitae,
Quodque feris animae constat (nec scivit inesse)

Floribus arboribusve, hoc tantum numen adorat.
Blandius insanit ! Modo ne omnis desinat esse,
Sic quod sit non esse velit pereatque libenter :
Quin fieri malit quod nondum norit, aquarumve
Antrorumve aliquid, vel pars vaga mobilis aerae.

At procul es ! Spirare mala hic contagia parcas,
Quicunque insipiens ! Non hic myrteta nemusve
Qua Puer introeat Veneris ! Si forte vagetur
Huc animo tristi, laniabit plurima plantas
Stirps teneras, nec non spinis paliurus acutis
Incomptas reddet plumas. Sic more volucris
Jam facile exceptae post vulnera saeva, Napaeae
Jam puerum illaqueate, et Oreades intemeratae,
Turba omnis Dryadum caligantesque sorores.

- (c) Vos quoque per terras flantes queis mane, procellae,
Rore tremunt nitidi quos texit aranea casses,—
Et tu si qua vagare, o tardi flaminis aura,
Mox serpens ubi erica, esae mox planta genistae
Truncos tollit ubi rigidos, qui, sole flagrante
Jam medio, quum saepe cavum rimata cubile
Est ovium mater, parcas fecere tenebras—
Quae stillis humore potes moderare remotis
Vellus ovis, mollique agno pascente per herbas
Blanda pari pariter mollissima murmure anhelas,—
Cunctus Hamadryadum coetus, Panisque pusilla
Progenies turbet turbansque sequatur Amorem !
Acria tela Dei : spinis magis acribus ille,
Tenue Dei numen, vexetur : vique trahatur
Ericio invectus repens per densa rubeta.

- (d) Jam mihi victori tandem exsultare licebit !
Jam licet indulgere mihi, nugisque jocabor,
Stultitia pejore, haud jam captivus, adempta.
Exesa placeat recubare sub ilice, muscus

Quam veterem tegit. Ecce, plagis velut, intertextit
Nexilibus ramos hederis. Hic membra reponam
Ad ripam fluvii, tacita secretus in umbra
Securaque quiete, atque inviolabilis ulli
(Ut totus saepe ex oculis absconditur orbis),
Caecus, inauditus, nusquam auscultans nisi rivo
Qui per saxa fremit dum tinnula murmura fundit,
Nec nisi percipiens vicina in stirpe frequentem
Gentem apium, mellis quae pabula grata recondit.
Qui venit huc Zephyrus nunquam conscivit Amori,
Virginis errantem (effusam) nunquam de fronte levavit
Caesariem, nec nudavit quae tempora circum
Purpura sublucescunt venarum. Haud more procacis
Improba nugatur : nec candida colla puellae
Tantum haud discluit, juveni nec amore furenti
Dira venena oculis sparsit, cui, si qua coruscet
Populus in silvis olim quas Phoebus inaurat,
Ceum res lapsa ruit, cor debile diffuset ultro.

XIV.

- (a) Nec tamen Arcturus condit quo tempore caelum
Humidus, arva negant gratos silvaeque labores.
Itur ad arva : canum vis imo pectore anhelans
Ancipitis circulos leporis sectata lacescit.
Sic animal nobis animal suasoribus urget,
Gensque in se, sic docta, suam petiere ruinam.
Nec minus ut silvae, nudata cacumina, canent
Frigoribus, per agros ipse anceps aere vagatur
Improbis ignivomo. Qua tegmina densa palumbes
Arboribus crebrae intexunt marcentibus, et qua
Pervolat nemus undosum, loca sola, scolopax :
Adducta est tuba : jam pariter telumque tetendit
Atque oculos : breviter tonitrus diverberat auram
Frigore concretam : quoties deserta volantes
Aetheriis peragrant, quaerentes pabula, gyris,

Mortiferum arguti plumbum sensere vanelli :
Cum parat alta volans in nubila carmen alauda,
Decidit exanimis, vitamque reliquit in astris.

- (b) Ver geniale redit : sub lene micantibus umbris
Qua tepidae spirant nebulae per prata, silenti
Adstat piscator ritu patiensque morandi.
Intentum tenet os : calamumque manu tremit : uno
Defixus sperat squamosam lumine prolem,
Dum salitans captat suber vimenque repressum.
Flumina larga creant varium genus. Illa flagravat
Perca oculis : Tyrio pictae stant murice pennae :
Sese anguilla sinu volvens argentea lucet.
Nonne cyprinus inest, squamis distinctus et auro,
Cui luteus color? En maculis variata per alvum
Velox trutta fugit rutilus : lupus ille natantum
Denique, qui liquidis ceu rex dominatur in arvis.

- (c) Jam Cancer bijugis Phoebi flagrantibus ardet.
It portis ; ruit ad cursus amissa juvenus
Silvestres alacris. Pars erupere frequentes
Per saltus, nemorum et calles indagine cingunt.
Pars celerem inmissis cervum exegere Molossis.
Stare loco nescit sonipes : calet, et tremit artus
Indignans : ferit absentem gravis ungula campum.
Flumina, convalles, juga transmisisse videtur
Ante fugam : pereunt vestigia mille moranti.
Ecce minas audax clivi superare juvenus
Certatim : virgulta per atque humiles convalles
Instans carpere iter : properantes quadrupedantum
Incubueri júbis proni, et mox ipsa videtur
Terra fugax celeri in cursu sublapsa referri.
An vetus Arcadiae tellus, amplissima campis,
Venatrice immortalis sese aemula jactat
Virgineoque choro? Tu, Tibur dulce, superbae

Necquicquam invidias cujus jam visa sub umbris
Diva nitens pariter, simili regina pudore,
Cui curae pariter regnum silvestre tueri,
Dum terris praebet radios, atque imperat undis.

S. E. W.

xv. *Jam nova progenies caelo demittitur alto.*

Proximus huic, opibus pollens et numine, natus
Tectam nube Dei longisque erroribus arcem
Inter castra vagam templo in splendente locabit.
Quem regum ambiguis sequitur rumoribus ordo,
Casti sive mali, sed nomina plura malorum,
Foeda superstitio quorum cumulataque gentis
Crimina flagitiis supremi Vindicis iram
Usque adeo accendent dum terram arcemque suorum
Templaque et intactam, jubar inviolabile, sedem
Ludibrio praedaeque urbi velit esse superbae,
Cui modo sublimes stare inter jurgia muros
Fine carens miramur opus : Babylona vocabant.
Hic jam septenos decies gens serviet annos :
Deinde suos tandem miserans sanctumque recordans
Foedus Jessiadae (manet hoc dum clara manebunt
Sidera) captivos Pater in sua regna reducet.
Tum venia regum populus Babylone relicta,
Suasit enim dominis illud Deus, ipsius aedem
Prima restituit cura, modicusque parumper
Rebus in angustis vivit : crescentibus inde
Divitiis numeroque virum discordia crescit,
Prima sacerdotes agitans, quos scilicet aris
Adstantes paci decet invigilare tuendae :
Quis domus ipsa Dei quom jam rixantibus hostes
Passa sit impuros, regnum violenter adepti
Stirpe satos vera spernunt, mox sceptrum vicissim
Rege sub externo ponunt ; ut juris aviti
Exsors terricolis nascatur ab aethere Princeps.

Hunc tamen haud alias visum per inania sidus
Nuntiat exortum, et limen natale petentes
Eoos docet ire magos quo dona ferentes
Myrrhea, quo turis regem venerentur et auri :
Quinetiam noctu pueri cunabula monstrat
Aliger interpres servantibus astra bubulcis ;
Laeti huc agrestes properant, superumque cohortis
Excipiunt gaudens venientis origine carmen.
Huic genetrix Virgo, genitor Patris omnipotentis
Spiritus : in solio dominabitur ille paterno,
Imperium terris, caelo exaequabit honorem.

R. C. J.

xvi.

Utraque festinat : cinctaeque ad pectora vestes
Brachia docta movent, studio fallente laborem,
Illic et Tyrium quae purpura sensit aënum
Textitur, et tenues parvi discriminis umbrae :
Qualis ab imbre solet percussus solibus arcus
Inficere ingenti longum curvamine caelum :
In quo diversi niteant cum mille colores,
Transitus ipse tamen spectantia lumina fallit.
Usque adeo quod tangit idem est : tamen ultima distant.
Illic et lentum filis immittitur aurum,
Et vetus in tela deducitur argumentum.
Cecropia Pallas scopulum Mavortis in arce
Pingit, et antiquam de terrae nomine litem.
Bis sex caelestes, medio Jove, sedibus altis
Augusta gravitate sedent. Sua quemque deorum
Inscribit facies. Jovis est regalis imago.
Stare deum pelagi, longoque ferire tridente
Aspera saxa facit, medioque e vulnere saxi
Exsiluisse ferum ; quo pignore vindicet urbem.

xvii.

Improba per noctem, quam longa, sonantia ponti
Litore harenoso reboant cava murmura : noctem

Per totam scopulis offensa Acherontia retro
Vox venit e caecis. Circum me stridere mergi :
Nunc mihi ludibrium et risus Nereidis aures
Percutere, ut miseram spernentis : adorta tumultu
Nunc adit unda altas rupes majore regressaque
Effluit, adproperet tanquam si bellua ponto.
Haud venit : at tantum moriens mihi luna recedit :
Sed neque perpetuus plangor nec montibus altis
Clamores cessant : deserta in rupe morantem
Fluctibus exesa exspectat me monstrifer aestus.
Ast ubi jam lucem secum intempesta trahit nox,
Tempore quo pereunt aegri, vixque ipse resignat
Lumina fessa timor, subito praeruptus aquae mons
Concutit en ! rupem : sensim in se turgida retro
Unda resorberi visa est scopulosque latentes
A fundo nudare maris : miseraeque tuenti
Horrendum aspectu, immani se corpore serpens
Squalidus extollit, species obscaena, per undas
Squamoso latere exsuperans cristaque timenda.

S. E. W.

XVIII.

At ferus interea consurgit collibus Eurus
Incubuitque mari atque immania murmura miscet.
Continuo nigrescere aquae sub flaminis ira
Crescente : at spirat tandem vis certa procellae.
Carbasus impletur, flammaeque foveantur adortae,
Et fumo navis circumdata fertur in altum.
Mox strepitu ingeminare ignis : crepitantis acervi
Audiri sonus ; et flammae per secta trisulcae
Robora perlucet tremebundae : acresque volutos
Per gyros jam summa ignes fastigia lambunt.
Funera corripiunt, malumque, exustaque vela :
Ipsa sed ad puppim flammis incensa movetur.
Interea divi stantes in fine tuentur :
Sol abiens piceâ in fluctus caligine tinctos

Mergitur : atque diem subiit nox atra caducam,
Vim posuit ventus : placidum mare nocte tacebat.

S. E. W.

XIX.

Tu, qui cernis uti cunctas res spiritus idem
Intus alat totamque agitet mens unica molem ;
Qui caecos hominum casus incertaque fati
Grandior incedens miserare ; evanida post tot
Saecula adhuc ceu stella micans tu lumine inauras
Nostrum hoc, quod falsae fugit instar imaginis, aevum ;
Praeteritosque inter reges redituraque nunquam
Regna nites ramus velut aureus ille per umbras.
En strepitus silet ille fori ; jam Caesaris aula
Purpurei cujusque jacet ; sed vox tua, quales
Oceani vasto volvuntur murmure fluctus,
Aeternum resonat Romae dominantis honores.
En ego (jam populus perrupit vincula liber)
Hospes ab Arctois longinqua voce Britannis
Toto olim penitus divisus orbe saluto,
Inclute, te, genuit quem felix Mantua ; nam te
Usque ego dilexi primis veneratus ab annis,
Dum quales non lingua alias humana creavit
Majestate graves numeros agis ore canoro.

T. G. Tucker.

XX.

Dixerat : et laetus terrarū corpora tabo
Dilapsura procul praesumit nare sagaci.
Sicut aves avidae turmatim ex aethere longe
In tempus certandi ac vulnera vasta serendi
Ad loca castrorum campo venere volantes
Corpora odoratae rostris viventia, leto
Danda sequente die crepero in certamine belli :
Haud aliter nasi monstrum illud pabula mortis
Captavit patulasque erexit ad aëra fuscum
Nares, inde adeo praedae praesagus opimae.

Dein ambo e portis Erebi in chaos inque profundam
Noctemque pluviasque et vasta sine ordine regna
Prosiluere fuga diversi ; ac numine, magnum
Numen erat, toto per stagna liquentia fusi,
Quae solida umor aquae dabat et quae lubrica caeno
Qualia jactantur pelago stridentibus undis,
Cuncta catervatim conflare et utrinque coacta
Moliri cumulo ad fauces atque ostia Ditis.
Qualis ubi vis ventorum contraria flabris
Certatim exercet Cronium mare ; montibus altis
Concrescit glacies ; qui mole obstare videntur
Petsoram super Eoam tendentibus ire,
Qua flavas opulenta Cathaïa pandit harenas.
